# Green Gram & Black Gram Management

## Fertilizer Management

| Crop Stage                                    | Fertilizer Name                                                                                                       | Dose (Acre)                     | Purpose                                                             |
|-----------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|---------------------------------|---------------------------------------------------------------------|
| At the time of sowing<br><br>(Seed Treatment) | 1) Bavistin<br>+2) Slayer Pro                                                                                         | 2 gm/kg<br>5 ml/kg              | For control of Fungal disease, pests and increase nutrient uptake   |
|                                               | After 2 hours (After the seeds dry)<br>1) Dr. Bactos Combo 4K<br>+2) Dr. Bactos Dermus 4K                             | 10 gm/kg<br>10 gm/kg            | Note: After seed treatment, the seeds should be dried in the shade. |
| At the time of sowing                         | 1) 18:46:00<br>+2) Dr. Bactos Pancham Gold<br>+3) Dr. Bactos NPK Gold Granules<br>+4) Dr. Bactos Dermus Gold Granules | 50 kg<br>10 kg<br>10 kg<br>4 kg | For supply of nutrients through basal dose and uptake of nutrients  |

## Spray Schedule

| Crop Stage               | Chemical Name                                        | Quantity (For 20 Lit Water) | Purpose                                                                             |
|--------------------------|------------------------------------------------------|-----------------------------|-------------------------------------------------------------------------------------|
| 15 days after sowing     | 1) Bavistin<br>+2) Slayer Pro<br>+3) Instafert Combi | 20 gm<br>20 ml<br>20 gm     | Control of Leaf-eating beetles, stem fly, Sucking pests and supply of micronutrient |
| At the time of flowering | 1) Score<br>+2) Coragen<br>+3) Prega Fast            | 10 ml<br>6 ml<br>50 ml      | For large amount of fruit setting and larvae control                                |
| Pod grain filling        | 1) 00:42:47<br>+2) Proclaim<br>+3) Scale Up          | 50 gm<br>10 gm<br>10 ml     | For control of fungal diseases, for filling of grains in pods                       |

- Take insecticide & pesticide spray if needed (After infestation of pest and diseases)
- To maintain pH, EC, TDS of spraying water, use Dr. Rich 0.5 ml / liter water.
- In rainy season, cloudy weather and fog conditions, Use Anand wet Gold at the rate 0.2 ml / liter water.
- Make necessary changes in fertilizers as per soil test.
